

THE STRATEGIC INNOVATION PARTNER FOR NETWORK OPERATORS

We turn raw network data into actionable insights and empower operators to transform their services beyond connectivity.

CUJO AI enables network service providers to understand, serve, and protect consumers with advanced cybersecurity and granular network and device intelligence. CUJO AI's advanced AI algorithms help NSPs uncover previously unavailable insights to raise the bar for customer experience and retention with new value propositions and improved operations. Fully compliant with all privacy regulations, CUJO AI services are trusted by the largest broadband operators worldwide.
